IT SOLUTIONS FOR FINANCIAL SERVICES

WHY CHOOSE OUR COMPANY:

Our Company is an information technology company with fifty years of proven experience that has delivered high-quality customer service in a dynamic and fast-paced environment. We are a company that can work with all levels of an organization and possesses the ability to create, plan and deliver on time. Our SERVICES have demonstrated and established a disciplined approach to all maturing technological environments. Our existing customers from across the country remember us fondly for multiple IT services that include infrastructure, hardware, software integration, consultation, and sales - both hardware and software, and more.

“WE STRIVE TO PROVIDE HIGH-QUALITY SERVICE AND SUPPORT WITH THE LATEST AND MOST INNOVATIVE TECHNOLOGY TO-DATE.”

Financial services firms have to remain compliant with frameworks such as FRCP, ESI, and GDPR. We recommend the following, for a secure and compliant IT infrastructure:

- Managed Security
- Managed Email Security
- Multi-factor Authentication
- Cloud Access Security Broker
- End Point Detection and Response
- Security Operations Center as a Service (SOCaaS)

Strategic IT Services for **Financial Firms**

Our Company has years of experience serving VC firms, hedge funds, family offices, and wealth management firms. We understand the nuanced needs of various financial service organizations—and we deliver Managed and Co-Managed IT solutions tailored to the needs of each organization.

Venture Capital Firms

VCs are reliant on technology for evaluating investments and managing their portfolios. They need to focus their time and talent on deals—not the care and feeding of IT platforms. We help VCs leverage technology to improve relationship management and transparency.

Hedge Funds

Hedge funds monitor global financial information and activity 24/7. They need rock-solid availability of their IT platforms and expert, real-time support. We've partnered with many hedge funds, advising them on best practices and helping ensure they're poised for growth.

Wealth Managers

Financial advisory firms must ensure compliance with an expanding array of evolving regulatory requirements. They need IT solutions that enable them to maintain and verify compliance.

Family Offices

Family offices provide superlative service to their high net worth individuals and families—they expect the same from their IT service provider. We provide expertise and highly responsive support that frees family offices to focus on their clients.

Investment Banks

Investment banks rely on technology to drive every aspect of their M&A businesses. They need IT solutions that keep them on the cutting edge, while safeguarding sensitive data and maintaining regulatory compliance.

ABOUT **THE COMPANY**

Our Company holds various network and security certifications to help you manage and stay ahead of the ever-changing security landscape. A team of twenty competent engineers will bring expertise to Azure, AWS, VMWare, Microsoft, etc., ensuring that your network, servers, and end-users needs are met 24/7.
